

Clay and shale stabilizer and weighting agent for water-based oil drilling fluids

PETROKALI

Advantages:

- Stabilizes water sensitive clays and shales
- Allows producing well-killing fluids of up to 1170 kg/m³ density
- Compatible with most drilling fluid additives
- High chemical purity
- 100% solubility in water

	Typical	Guarantee
Potassium chloride (KCl) content, %, min		98.2 min
Insolubles in water, %	0.01	
Moisture content, %		0.5 max
Granulometric composition, %: less than 2 mm	100	

Product is available in bags and big bags
